

DARK SIDE

FEATURING **FREESCAPE™** BY **MAJOR DEVELOPMENTS**

**HIGHLY
CONFIDENTIAL**

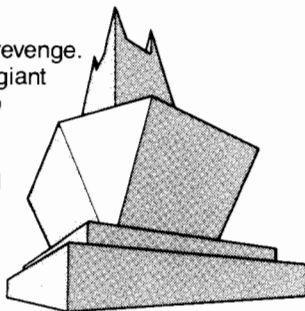

MISSION BRIEFING SPECTRUM

WELCOME TO YOUR MISSION!

BACKGROUND

200 years on from Driller times, the Ketars take revenge. On the Dark Side of Evath's other moon, Tricuspid, a giant weapon, Zephyr One, has been constructed aimed to blow Evath to bits.

To gain sufficient power, a network of ECD's (Energy Collection Devices) were constructed around the moon. The suspended solar cell at the ECD apex collects energy from Evath's sun then transmits this energy through the power line matrix for the final assault on Evathkind.

OBJECTIVE

To avoid mass panic on Evath this mission is highly confidential. You have been dropped inconspicuously on Tricuspid into a safe drop zone by a routine patrol ship. Your mission is to destroy every ECD, thus disabling the Zephyr One weapon and saving Evath from certain destruction. Score guide – first week target – one million points.

YOUR EQUIPMENT

Your space suit comes complete with quad lasers, a plasma band shield, jet power pack for extra mobility, plus a small supply of fuel.

YOUR VIEW

The display shows the Freescape™ generated view through your space suit helmet. The LED lights to the right indicate the rate at which the ECD's are collecting power. When the top LED lights, Zephyr One will fire!!!

TIME IS CRUCIAL

Evath is only minutes away from destruction. Every time an ECD is successfully disabled the energy collection rate will be slowed, thus allowing more time.

**ONLY THE BEST WILL SUCCEED.
GOOD LUCK!**

ALSO

Also from Incentive – Driller featuring Freescape™ price £14.95 cassette, or £17.95 disc. Available from all leading retailers or direct from Incentive POST FREE.

MISSION INFORMATION

The following information has been collected by previous unsuccessful missions:-

ECD's

If an ECD is shot – it will be disabled. If the ECD is connected between 2 other active ECD's the device will regenerate immediately.

POWERPORTERS

A product of future technology
These suspended slabs are Instant Teleportation devices.

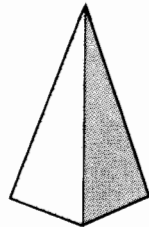

PLEXORS

These are "tank like" defences placed around Tricuspid. They will attack if you are within range.

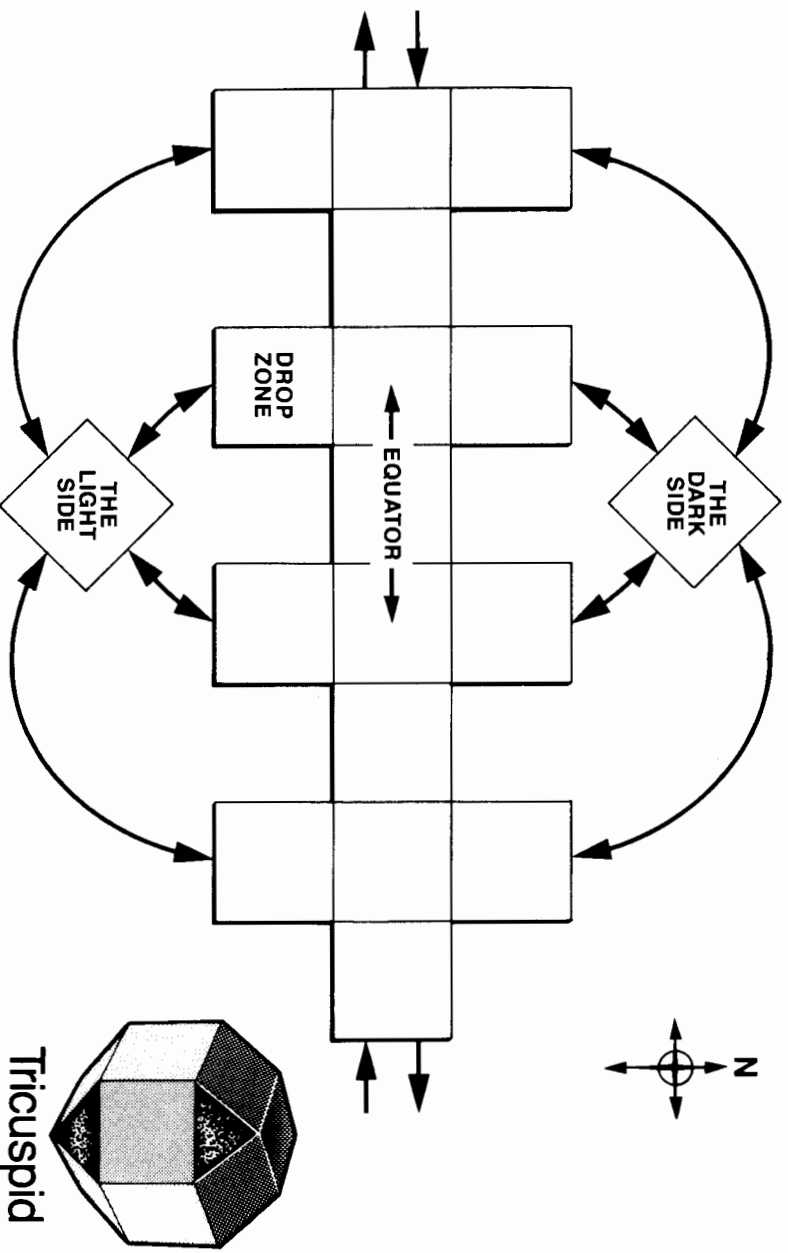

TELEPOD

This was used by the Ketars to gain access to restricted areas. Before abandoning the moon the Ketars hid the telepod crystals. These must be located before the telepod can be activated.

TELEPOD CRYSTAL

**LAYOUT OF THE PLATFORM STRUCTURE
CONSTRUCTED AROUND THE TRICUSPID MOON.**

REMEMBER: A STEP IN THE DARK – IS A STEP IN THE RIGHT DIRECTION!
